PROFESSIONAL SUMMARY

Systems Analysis and Development graduate with a solid foundation in programming, databases, data analysis, and web development, built through academic education and a range of practical courses. Familiar with JavaScript, HTML, CSS, Python, SQL, Power BI, REST APIs, .NET, and web development, as well as data analytics, RPA automation, Artificial Intelligence fundamentals, Agile methods, and DevOps. Analytical, quick to learn new technologies, and motivated to deepen knowledge in data, software development, and technology-based solutions while pursuing professional growth and a long-term career in IT.

Programming Projects

- Task Manager (React): A simple task-management application for organizing activities. Uses dnd-kit for drag-and-drop functionality and integrates with a database to store tasks.
- Interactive Evolution Web App (HTML, CSS, JavaScript): A small website inspired by an entertainment franchise, allowing users to organize elements in a large evolutionary tree and explore their relationships interactively.
- Image-sharing website (Angular): A website where users can post images with comments and view them through API integration.
- User login and personal area (React): An ongoing project with API-integrated login and user-specific information displayed on a protected page.

Docker was used in projects where applicable. Projects are available on the GitHub profile listed above.

TECHNICAL SKILLS

Proficient	Advanced English; Python (object-oriented programming, API consumption, Pandas, data analysis and processing); SQL and databases (MySQL and SQLite: queries, joins, views, procedures and functions); Power BI (ETL, data modeling, DAX and interactive dashboards); Excel (data analysis and automation); computer and digital equipment operation; data analytics (ETL, visualization, applied statistics and data storytelling); drawing; web development with JavaScript, HTML, CSS, React.js, TypeScript and AngularJS.
Intermediate	C# / .NET 6 (Web APIs, Entity Framework, LINQ and Identity); REST APIs and HTTP; Java; PHP 7; document and presentation tools; Power Automate; MongoDB; analytics; GitHub; DevOps and Agile methods; Docker.
Basic	KPIs and performance indicators; Artificial Intelligence fundamentals; Python applied to AI; LangChain and RAG concepts for chatbots; RPA with UiPath; Linux.

PROFESSIONAL EXPERIENCE

IT Intern Public School

Municipality of Caraguatatuba Caraguatatuba, S o Paulo, Brazil | Feb 2023 Dec 2023

- Maintained the IT equipment at Luiz Ribeiro Muniz School, especially computers as well as sound systems and projectors, helping teachers and students use them effectively by resolving or reporting issues.
- Supervised students in the computer lab to ensure they followed the rules.
- Set up and prepared digital equipment for school events.

Key equipment: Computers, mice, keyboards, sound systems, projectors, televisions, and other digital devices.

EDUCATION

Postgraduate Program in Web Development In progress

SENAC EAD

Completed coursework listed in the r sum : Agile Project Management; DevOps; Software Architecture; Interaction Languages; Dynamic Web Systems with Databases; Microservices Development.

Associate Degree in Systems Analysis and Development

Federal Institute of Education, Science and Technology of Caraguatatuba, S o Paulo, Brazil | Jan 2021 Dec 2023

Relevant coursework: Communication and Expression; Discrete Mathematics; Computer Architecture; History of Science and Technology; Technical English; Programming Logic; Systems Analysis; Programming Languages; General Administration;

Operating Systems; Computer Networks; Probability and Statistics; Organization, Systems and Methods; Databases; Data Structures; Server Deployment; IT Service Management; Research Methodology; Systems Design; Integrated Project; Management Information Systems; IT Management; Web Development; Software Engineering; Information Security; Advanced Topics.

Technical Diploma in Administration integrated with High School

Etec de Caraguatatuba, S o Paulo, Brazil | Jan 2018 Dec 2020

Full-time integrated technical and secondary education. The original r sum reports that most academic assessments were rated from Good to Very Good.

LANGUAGES

Portuguese: Fluent English: Advanced Spanish: Basic

CERTIFICATES AND COURSES

English CNA, Caraguatatuba, S o Paulo, Brazil | Mar 2018 Dec 2020

English Private lessons, Caraguatatuba, S o Paulo, Brazil

Information Technology Fundamentals IBM SkillsBuild
Practical RPA with UiPath: Learn from Scratch Udemy
KPI Performance Indicators: Practical Course Udemy
AngularJS in Practice Udemy
Complete PHP 7 Course Udemy
React: Start Your Full-Stack Project Alura

ASP.NET Core with C#, .NET, Entity Framework and LINQ Alura (4-course learning path)

.NET 6: Creating a Web API
HTTP: Understanding How the Web Works Under the Hood
.NET 6: Relating Entities
.NET 6 and Identity: Implementing User Management

Power BI Alura (4-course learning path)

Power BI Desktop: Building My First Dashboard
Power BI Desktop: Performing ETL in Power Query
Power BI: Building Calculations with DAX
Power BI: Visualizing and Analyzing Data

Learn Python with Object-Oriented Programming Alura (3-course learning path)

Python: Create Your First Application
Python: Applying Object-Oriented Programming
Python: Advance in Object-Oriented Programming and Consume APIs

Practicing Python Alura (8-course learning path)

Conditionals: if, elif and else
Loops: for and while
Strings and Regular Expressions
Lists and Tuples
Sets and Dictionaries
Functions
Asynchronous Programming
Working with Projects

AI Engineering Career Path Alura (in progress)

Welcome and First Steps
Computational Thinking: Computing Fundamentals and Programming Logic
Python: Applied Artificial Intelligence
LangChain: Building Intelligent Chatbots with RAG

DATA ANALYSIS AND ANALYTICS COURSES

Data Analysis Career Path Alura (courses completed)

- Welcome and First Steps in the Data Analysis Career Path
- Python for Data Science: First Steps
- Python for Data Science: Working with Functions, Data Structures and Exceptions
- Statistics with Python: Frequencies and Measures
- SQLite Online: Learning SQL Statements
- Excel: Mastering the Spreadsheet Editor
- Working with Data: Fundamentals of Data Analysis
- Data Storytelling: Turning Data into Impactful Stories
- SQLite Online: Running SQL Queries
- SQL Queries: Joins, Views and Transactions
- SQLite Online: Data Analysis with SQL
- Power BI: Intelligent Data Analysis
- Power BI: DAX Fundamentals
- Power BI: Data Modeling
- Excel for Data Analysis: Functions, Tables and Charts
- MySQL: Getting to Know the Tool
- MySQL: Running Stored Procedures
- MySQL: Working with Functions
- MySQL for Data Analysis
- Pandas: Getting to Know the Library
- Pandas I/O: Working with Different File Formats
- Pandas: Selecting and Grouping Data
- Excel: Advanced Data Manipulation and AI Automation
- Pandas: Data Cleaning and Processing
- Pandas: Data Transformation and Manipulation
- Statistics with Python: Summarizing and Analyzing Data
- Power BI: Interactive Dashboards and Data Analysis
- Data Visualization: Creating Charts with Python Libraries
- Data Analysis Project: Data Organization, Processing and Visualization
- Data Analysis Career Path: Level 1 Checkpoint
- Data-Driven: Organizational Transformation with a Focus on Data
- Power BI: Advanced Data Connections
- Python and APIs: Getting to Know the Requests Library
- Data Science: Hypothesis Testing
- Statistics with Python: Correlation and Regression
- Power BI: Creating, Publishing and Managing Reports and Dashboards
- Google BigQuery: Exploring the Cloud
- Google BigQuery: Mastering Strings and Dates
- Google BigQuery: Logical and Numeric Functions
- Google BigQuery: Data Manipulation
- Google BigQuery: Advanced Queries
- Data Governance: Exploring Fundamental Concepts
- LlamaIndex: Analyzing Data with Pandas
- LlamaIndex: Building a Virtual Assistant for Database Queries
- Power Automate: Automating a Data Analyst s Tasks
- Automation with n8n: Building Workflows and Integrating Services
- Data Analysis Project: Data-Driven Cybersecurity
- Data Analysis Career Path: Level 2 Checkpoint
- MongoDB: Getting to Know a NoSQL Database
- MongoDB: Data Validation
- MongoDB: Running Queries
- Analytics Engineering: Implementing an ETL Pipeline with AWS Glue
- Analytics Engineering: Analyzing Data with Amazon Athena and AWS Glue
- Analytics Engineering: Building an Automated Pipeline
- Analytics Engineering: Presenting Results with QuickSight
- Machine Learning: Classification with scikit-learn

Data Science: Testing Relationships with Linear Regression
Power BI: Advanced DAX Analysis
Data Analysis Project: Interactive Dashboards with SQL, BigQuery and Power BI
Data Analysis Career Path: Level 3 Checkpoint

BACK-END PYTHON AND ADDITIONAL TRAINING

Back-End Python Development Career Path Alura (in progress)

Completed courses listed in the r sum ; some overlap with the Python learning paths above:

- Computational Thinking: Computing Fundamentals and Programming Logic
- Python: Create Your First Application
- Practicing Python: Conditionals (if, elif and else)
- Practicing Python: Loops (for and while)
- Practicing Python: Functions
- Git and GitHub: Sharing and Collaborating on Projects
- Practicing Python: Working with Projects
- Python: Applying Object-Oriented Programming
- Practicing Python: Lists and Tuples
- Python: Advancing in Object-Oriented Programming and Consuming APIs
- Practicing Python: Sets and Dictionaries
- Networks and Protocols: Web Fundamentals
- Python: Data Persistence with Files, Databases and REST APIs
- Practicing Python: Strings and Regular Expressions

ADDITIONAL NOTES

The original r sum lists courses and learning paths completed through providers including Alura, Udemy, IBM SkillsBuild, and CNA. Learning paths marked as in progress have been kept as such. Course titles have been translated into English for readability; provider names and technical product names remain unchanged.
